

# STOP! ASD HAZARDS

ERASMUS + KA2: 2017-1-ES01-KA204-037880

## NEWSLETTER 02

Dear partners:

The project "STOP! ASD HAZARDS" continues its course, during the last months the partnership of the project has been devoted to developing the different intellectual products whose final purpose focuses on improving the prevention of risks and occupational health of people with ASD.

Specifically and once analyzed and selected the five key positions in which people with Autism develop their professional activity, we have developed the following activities:

1.- The preparation of a **Methodological Manual for the correct training of the ASD collective**. The purpose of this Manual is to define the optimal training methodology that must be applied both for an adequate preparation of the training courses and for the development of the relative videogames to the prevention of risks and occupational health of the autistic that will be carried out in the project.

2.- The drafting of a **Manual of Good Practices** for the prevention of risks and occupational health of the ASD collective.

This manual includes an analysis on the state of the art and the best local and regional practices in the prevention of occupational risks and occupational health of the ASD collective as well as a series of conclusions and recommendations to carry out to improve the situation of the collective in the workplace.

At present, we are finalizing the training content safety and health at work that serve the project's target groups to monitor for the occupational health of the ASD collective.

Co-funded by the  
Erasmus+ Programme  
of the European Union

## NEWSLETTER 02

### SECOND INTERNATIONAL MEETING

On April 25, we met again the partners of the project in the town of İzmit (Kocaeli) of Turkey.

It was an intense but very pleasant day, which allowed us not only to exchange opinions about the ongoing and future tasks that remain to complete the project, but also to learn about two entities in which people with disabilities work.

One of them, very sweet, since it is one of the most famous industries of Turkey: CAN Pişmaniye.

After the morning session, we moved to the facilities of an impressive complex: the Bizimkoy Engelliler Uretim Merkezi Vakfi. space where people with different disabilities work.

### INFO ABOUT THE PROJECT
